

Ensuring your lift is safe is crucial. Being a responsible lift owner, building or facilities manager you have a duty to ensure lifts are serviced and well maintained. With this in mind, it's crucial that all lift maintenance services are carried out on a regular basis, by trained engineers in line with the manufacturer's recommendations and our stringent safety processes.

We carry out a range of lift repairs from LED lighting upgrades, through to completely new bespoke lift installations. Our reputable customer service levels, and dedication to customer satisfaction mean we're able to tailor all lift maintenance and service agreements to suit your individual requirements, allowing us to provide you with the most cost-effective option.

LIFT MAINTENANCE

It is good business practice and a requirement under health and safety legislation that all lift systems must be maintained on a regular business.

Bridge Lifts meet these requirements by servicing your lift equipment on a time schedule that best suits you and providing the highest professional and engineering standards to ensure compliance with all statutory regulations.

INSTALLATIONS & MODERNISATIONS

Each lift is designed to your requirements taking into account specification, long term value for money and building limitations. This does not necessarily mean expensive, and we have completed many successful installations on time and on budget to the complete satisfaction of our clients.

We modernise and install lifts for businesses in all sectors of industry. Repairs and Modernisations can be fitted to improve the condition and age of your lift.

All modernisations are bought up to BSEN81 Standard. Modernisations include a British made panel, all new shaft and lift car lighting systems, all new lift components and landing push and car buttons.

REPAIR

We offer a wide range of lift repairs and if ever immediate work is needed following a breakdown we can offer this within reason, always ensuring health & safety requirements are followed, and any upgrades meet statutory regulations.

We offer a free no obligation quote for all works going forward and you don't necessarily have to be under contract with us for repairs to be carried out on your lift(s).

LOLER INSPECTIONS

Regulation 9 of the Lifting Operations and Lifting Equipment Regulations 1998 (LOLER) requires that all lifts provided for use in work activities are thoroughly examined by a competent person at regular intervals. This applies to lifts and hoists used to lift people or loads.

YOUR LIFT SERVICE EXPERTS
